why teacher education @Bethany?
For more than 100 years, Bethany College has included programs for teacher preparation in its curriculum. Today, Bethany students can receive education leading to licensure at the elementary, secondary, and PreK-12 levels in a variety of disciplines, including special education.

The teacher education faculty includes both full-time and part-time professors who come from a variety of education backgrounds, including current and former teachers and principals. Their experiences bring both theory and practical experience to the classroom.

More than 90% of our graduates have jobs in the field of education within six months of graduating from Bethany College. The Education Department is accredited by the National Council for Accreditation of Teacher Education (NCATE) and the Kansas State Department of Education (KSDE).

Additional endorsements may be acquired in Special Education grades K-6 and 6-12, English as a Second Language K-6 (KSDE approved Spring of 2012) and 6-12 pending (KSDE approval Fall of 2012), and Preparation for Middle Level Endorsement for Elementary Education majors as specified by KSDE.

Candidates graduating with a Bachelor’s Degree in Education from Bethany College are qualified to pursue advanced degrees in many educational fields.
program mission
